### Editorials

- **Prospects for Multimodality Imaging in Peripheral Artery Disease**
- **PFO or UFO: How Good Is Transesophageal Echocardiography in Identifying Patent Foramen Ovale as the Cause of a Cryptogenic Stroke?**
- **Symptoms in Patients With Severe Aortic Stenosis and Preserved Left Ventricular Ejection Fraction: Is It All About Diastole?**

### Original Articles

- **Investigation of Global and Regional Myocardial Mechanics With 3-Dimensional Speckle Tracking Echocardiography and Relations to Hypertrophy and Fibrosis in Hypertrophic Cardiomyopathy**
- **Impaired Hyperemic Myocardial Blood Flow Is Associated With Inducibility of Ventricular Arrhythmia in Ischemic Cardiomyopathy**
- **Interrogating Congenital Heart Defects With Noninvasive Fetal Echocardiography in a Mouse Forward Genetic Screen**
- **Quantitative Computed Tomographic Coronary Angiography: Does It Predict Functionally Significant Coronary Stenoses?**
- **Adult Height and Prevalence of Coronary Artery Calcium: The National Heart, Lung, and Blood Institute Family Heart Study**
- **Myocardial Strain Analysis by 2-Dimensional Speckle Tracking Echocardiography Improves Diagnostics of Coronary Artery Stenosis in Stable Angina Pectoris**
- **Multicenter, Randomized Trial of Quantitative Pretest Probability to Reduce Unnecessary Medical Radiation Exposure in Emergency Department Patients With Chest Pain and Dyspnea**
- **Association Between Left Ventricular Global Longitudinal Strain and Adverse Left Ventricular Dilatation After ST-Segment–Elevation Myocardial Infarction**
- **Multifactorial Relationship Between 18F-Fluoro-Deoxy-Glucose Positron Emission Tomography Signaling and Biomechanical Properties in Unruptured Aortic Aneurysms**
- **Multimodality Imaging Approach for Serial Assessment of Regional Changes in Lower Extremity Arteriogenesis and Tissue Perfusion in a Porcine Model of Peripheral Arterial Disease**
- **Prognostic Value of Cardiovascular Magnetic Resonance Imaging Measurements Corrected for Age and Sex in Idiopathic Pulmonary Arterial Hypertension**
- **Changes in Right Ventricular Function Measured by Cardiac Magnetic Resonance Imaging in Patients Receiving Pulmonary Arterial Hypertension–Targeted Therapy: The EURO-MR Study**

### Translating Novel Imaging Technologies Into Clinical Applications

- **Sample Size and Cost Analysis for Pulmonary Arterial Hypertension Drug Trials Using Various Imaging Modalities to Assess Right Ventricular Size and Function End Points**
- **Transesophageal Echocardiography in Cryptogenic Stroke and Patent Foramen Ovale: Analysis of Putative High-Risk Features From the Risk of Paradoxical Embolism Database**
- **Echo-Guided Mitral Repair**
- **Left Ventricular Diastolic Function Is Associated With Symptom Status in Severe Aortic Valve Stenosis**
- **Evaluation of Vegetation Size and Its Relationship With Embolism in Infective Endocarditis: A Real-Time 3-Dimensional Transesophageal Echocardiography Study**
- **Aortic Annular Sizing Using a Novel 3-Dimensional Echocardiographic Method: Use and Comparison With Cardiac Computed Tomography**
- **Validation of Noninvasive Indices of Global Systolic Function in Patients With Normal and Abnormal Loading Conditions: A Simultaneous Echocardiography Pressure–Volume Catheterization Study**
- **Rationale and Design of a Multicenter Echocardiographic Study to Assess the Relationship Between Cardiac Structure and Function and Heart Failure Risk in a Biracial Cohort of Community-Dwelling Elderly Persons: The Atherosclerosis Risk in Communities Study**

### Controversies in Imaging

- **Is MRI the Preferred Method for Evaluating Right Ventricular Size and Function in Patients With Congenital Heart Disease?**
- **Is MRI the Preferred Method for Evaluating Right Ventricular Size and Function in Patients With Congenital Heart Disease**
- **Is MRI the Preferred Method for Evaluating Right Ventricular Size and Function in Patients With Congenital Heart Disease?**

### Cardiovascular Images

- **Successful Diagnosis of an Atypical Prosthetic Vascular Graft Infection Without Perivascular Abscess: Luminal Vegetation as the Hidden Septic Source**
