Editorials

Mechanistic Insights Into the Link Between Inflammation and Cardiovascular Disease: Rheumatoid Arthritis as a Human Model of Inflammation p 575
Coronary Artery Calcium Testing: Exploring the Need for a Randomized Trial p 578
From Molecular Imaging to Pathogenesis and Vice Versa... p 581

Original Articles

Left Atrial Passive Emptying Function Determined by Cardiac Magnetic Resonance Predicts Atrial Fibrillation Recurrence After Pulmonary Vein Isolation p 590
Prevalence of Myocardial Fibrosis Patterns in Patients With Systolic Dysfunction: Prognostic Significance for the Prediction of Sudden Cardiac Arrest or Appropriate Implantable Cardiac Defibrillator Therapy p 593
The Total Right/Left-Volume Index: A New and Simplified Cardiac Magnetic Resonance Measure to Evaluate the Severity of Ebstein Anomaly of the Tricuspid Valve: A Comparison With Heart Failure Markers From Various Modalities p 601
Mechanisms of Right Ventricular Electromechanical Dyssynchrony and Mechanical Inefficiency in Children After Repair of Tetralogy of Fallot p 610
Increased Benefit of Interleukin-1 Inhibition on Vascular Function, Myocardial Deformation, and Twisting in Patients With Coronary Artery Disease and Coexisting Rheumatoid Arthritis p 619
Coronary Artery Disease Detected by Coronary Computed Tomographic Angiography Is Associated With Intensification of Preventive Medical Therapy and Lower Low-Density Lipoprotein Cholesterol p 629
Adenosine Stress Cardiovascular Magnetic Resonance With Variable-Density Spiral Pulse Sequences Accurately Detects Coronary Artery Disease: Initial Clinical Evaluation p 639
Ischemic Burden by 3-Dimensional Myocardial Perfusion Cardiovascular Magnetic Resonance: Comparison With Myocardial Perfusion Scintigraphy p 647
Outcomes After Coronary Artery Calcium and Other Cardiovascular Biomarker Testing Among Asymptomatic Medicare Beneficiaries p 655
Reference Ranges of Blood Flow in the Major Vessels of the Normal Human Fetal Circulation at Term by Phase-Contrast Magnetic Resonance Imaging p 663
Feasibility of Optical Coherence Tomography in Children With Kawasaki Disease and Pediatric Heart Transplant Recipients p 671
In Vivo Assessment of Aortic Aneurysm Wall Integrity Using Elastin-Specific Molecular Magnetic Resonance Imaging p 679
Assessment of Elastin Deficit in a Marfan Mouse Aneurysm Model Using an Elastin-Specific Magnetic Resonance Imaging Contrast Agent p 690
In Vivo Molecular Imaging of Thrombosis and Thrombolysis Using a Fibrin-Binding Positron Emission Tomographic Probe p 697
Real-Time Magnetic Resonance Assessment of Septal Curvature Accurately Tracks Acute Hemodynamic Changes in Pediatric Pulmonary Hypertension p 706
Natural History of Paradoxical Low-Gradient Severe Aortic Stenosis p 714

Advances in Cardiovascular Imaging

Achieving Very-Low-Dose Radiation Exposure in Cardiac Computed Tomography, Single-Photon Emission Computed Tomography, and Positron Emission Tomography p 723
Imaging Challenges in Secondary Mitral Regurgitation: Unsolved Issues and Perspectives p 735

How to Use Imaging

Novel Imaging of Coronary Artery Anomalies to Assess Their Prevalence, the Causes of Clinical Symptoms, and the Risk of Sudden Cardiac Death p 747

Cardiovascular Images

Neointimal Proliferation Is Associated With Clinical Restenosis 2 Years After Fully Bioresorbable Vascular Scaffold Implantation p 755
